Abstract not available for EP1404969

Abstract of correspondent: **FR2827015**

The invention concerns wind turbines installed on an offshore site, particularly at sea, support structures forming part of the wind turbines, and methods for making and installing said wind turbines. The technical field of the invention is the manufacture, transport and installation of wind turbines producing electric power, more particularly offshore and in large numbers, to form fields of wind turbines. The inventive wind turbine (1) comprises a wind-driven motor (4b, 4c) and a telescopic extensible support or mast supporting the motor, and a gravity base (2) supporting the support or mast.
